# HARVIE PASSAGE

Connecting communities, parks and facilities on the Bow River

# HARVIE PASSAGE

The Bow River weir is currently being modified to accommodate safe passage for small watercraft and fish. This project has been named "Harvie Passage" due to the philanthropic support of the Harvie Family.

Construction is now underway. Please stay away from the construction area and surrounding shore line throughout the construction period. These areas are not safe. Please adhere to all safety and detour signs placed throughout the area. If you would like a safe place to watch the progress of construction, please use the viewing platform/overlook which can be accessed through the interpretive trails in Pearce Estate Park.

You might notice that the landscape is also being modified in the surrounding areas. Some trees need to be removed in order to allow passage of trucks and other construction materials. It is important that we make these changes now before birds return to nest in the spring time. For each tree cut down, three will be planted upon completion of construction.
